OUR GREEN COMMITMENT

Build green with planet-friendly products.

Like you, all of us at Atlas Block are committed to a cleaner, healthier world. That's why we have chosen to incorporate sustainable construction innovations into all of our products. For everything from foundations and facades to beautiful outdoor living spaces, we have green concrete solutions for every project.

Every one of our products contain recycled material; we're proud to be the first company in our industry to make that kind of commitment to the environment. Every product incorporates up to 36% eco-friendly Poraver® post-consumer recycled glass, which is LEED®-friendly and an ideal choice for sustainable construction.

RECYCLED GLASS THAT'S BREAKING BARRIERS

Did you know that certain types of coloured glass can't be recycled to make new glass products? That means that even if you put them in your blue bin, they end up as landfill. Until now.

Here's how it works

Using patented Poraver® technology, discarded glass is collected from municipal blue bin programs.

The glass is ground into a fine powder, which is then refined into lightweight pellets.

When the pellets are mixed into concrete, they lessen the impact on our natural resources – without sacrificing strength or product integrity.

Atlas Block. We're building a stronger, more beautiful world, one block, brick and paving stone at a time.

OUR GUARANTEE.

Atlas Block Co. Limited provides a lifetime guarantee on the structural integrity of its manufactured landscape products to the original purchaser of the product for residential or commercial use. If defective material is installed using our installation guidelines, it will be replaced without cost, with proof of purchase. We cannot guarantee the colour match of replacement units and this guarantee does not extend to replacement labour.

Note: Many de-icing compounds can cause deterioration in concrete products. As such, this lifetime guarantee does not extend to product damage arising from the use of these and other corrosive materials. In order to ensure that your Atlas Block project will be yours to enjoy for a lifetime, we recommend that you refrain from the use of magnesium salts and apply de-icing compounds in moderation.
