

TECHO — BLOC

INSPIRING ARTSCAPES

THE ART OF LIVING OUTDOORS

Design begins long before the first stone is laid. It starts with a spark, a vision of what life could feel like. It begins with you: with the desire to slow down, to gather, to reconnect, and to shape a space that reflects the way you want to live.

At Techo-Bloc, every surface tells a story. Our textures invite touch. Our colors shift with the light. Our forms frame connection. Every slab, paver, and wall becomes a building block for experience, for barefoot mornings, for dinners that stretch into the night, and for small moments that turn into lasting memories. Great design is not about perfection; it is about emotion, balance, and the quiet beauty that changes how you feel at home.

For thirty-seven years, we have carried forward the belief that outdoor design is not just construction; it is creation. We have pushed design norms not by following trends but by shaping them, guided by intention and inspired by the space where architecture blurs into art. We design for the dreamers and the creators, those who see their backyard not as an afterthought but as the heart of their home.

This is more than hardscape. It is the art of living outside, designed from the ground up.

For an authentic look, each color option is composed of a variety of darker and lighter tones. Natural ingredients are present within the recipe to allow for a range in tones, veining and textures from one stone to another. Color samples for reference only. Actual product colors may vary.

CONTROLLED CONTRAST

Sculptura Scalloped fire pit in Cool Grey

A NEW APPROACH TO CONTRAST

High-contrast outdoor spaces are fading out. Today's look is all about controlled shifts in tone and texture that create definition without overpowering the space.

In this backyard, every surface works together rather than competing. Terrazzo Meteor Black slabs anchor the dining and kitchen area with a refined polish. As the layout moves toward the pool, Greyed Nickel Industria pavers lighten the palette and offer a cooler underfoot feel. The gradual transition softens the entire environment, creating a cohesive flow between zones.

At the center, the scalloped Sculptura firepit adds gentle movement without disrupting the calm. Black metal details and warm wood accents tie everything together, grounding the design and keeping it connected to nature.

This is contrast used with intention; not loud, not harsh, but controlled. The result is a modern retreat where balance comes naturally and materials work in harmony rather than standing in opposition.

Limestone cap in Onyx Black

BLENDING OF NATURAL AND ENGINEERED MATERIALS

Outdoor spaces are shifting back toward a more natural feel. Instead of choosing between man-made or organic materials, the trend is to blend both so they work together. The result is a space that feels grounded, familiar, and connected to its surroundings.

Here, Limestone caps in Onyx Black bring a clean architectural edge, while Westmount cobblestone-style pavers in Chestnut Brown soften the layout with warmth and texture. A linear creek with natural stone flows through layered greenery, reinforcing the sense of place and creating a natural rhythm in the design.

Together, these elements blur the line between what's built and what belongs. This proves that engineered stone and nature can complement each other effortlessly. The more the materials echo their environment, the more the entire space feels like it was always meant to be there.

THIS PROJECT](#)

QUIET DETAILS

DESIGNING WITH UNDERSTATED DETAILS AND CALM MINIMALISM

Design is shifting toward a quieter aesthetic; spaces where tone-on-tone materials, soft geometry, and subtle craftsmanship create a calming, refined atmosphere. Instead of bold contrasts or loud features, the focus is on details that reveal themselves slowly.

Here, large Industria 600 × 600 slabs in Caffè Crema set a seamless, understated foundation. Within the layout, select pieces feature the Industria Flora etching, a delicate flower pattern pressed into the surface. It's only visible when the light hits just right or when you step closer, adding a layer of interest without disrupting the minimal look. Small Squadra accents contribute to gentle rhythm and structure while keeping the palette cohesive.

This approach favors restraint, softness, and precision. It's a new kind of elegance, one that feels calm at first glance, and more rewarding the longer you stay in the space.

THE FIRE PIT AS A STATEMENT PIECE

Industria 300×100 HD² Smooth paver in Greyed Nickel and Sculptura Scalloped fire pit in Cool Grey

A MORE REFINED POINT OF VIEW

Firepits are evolving from functional add-ons into refined design statements. Instead of heavy, rustic forms, today's outdoor spaces lean toward fire features with soft lines, gentle curves, and a sculptural presence—pieces that look purposeful, permanent, and beautifully integrated into the landscape.

This shift is driving a preference for firepits that feel architectural yet approachable: shapes that complement modern patios, textures that add quiet sophistication, and silhouettes that look just as elegant unlit as they do glowing. A refined firepit doesn't just warm the space; it completes it.

The Sculptura collection embodies this movement with its smooth contours and subtly detailed forms. These pieces blend seamlessly into the hardscape, offering a built-in aesthetic that feels natural and intentionally placed. Graceful and modern, they anchor the space without overwhelming it, bringing warmth, softness, and style to the outdoor room.

MODERN DESIGN BRINGS BACK SOUL

Squadra paver in Onyx Black

A RETURN TO TEXTURE AND CHARACTER

Today's modern homes are moving away from the flat, minimal look and returning to design with texture, scale, and story. Instead of sanitizing surfaces, designers are choosing materials that feel lived-in, grounded, and tied to a place.

This shift is inspired by timeless cues such as cobblestone patterns, estate stone walls, and hand-worked surfaces; details that bring visual depth and a sense of permanence. Small-format pavers add intimacy and scale, creating rhythmic patterns that guide movement and define transitions without breaking the visual flow.

Squadra paver's fine texture, compact size and striking color support this new direction. Light and shadow move fluidly across each piece, revealing new textures throughout the day. Paired with natural stone walls, greenery, metal accents. The result is modern but rooted, fresh but familiar.

This is the new modern: not minimal, but meaningful. Design that values proportion, depth, and intention. Architecture that feels built to last because it carries character from the very first glance.

THE WARM REVIVAL

Industria 600 x 600 HD² Smooth slab in Caffè Crema and Raffinato step in Caffè Crema

THE RISE OF BEIGE IN MODERN OUTDOOR DESIGN

Beige is emerging as the new anchor of contemporary outdoor spaces. After a long period dominated by cool greys, designers are shifting toward warm neutrals to bring softness, and depth to their projects. Beige enhances modern architecture instead of competing with it, creating spaces that feel grounded and inviting from the moment you step outside.

In this project, Caffè Crema Industria slabs show how warm tones can reset the entire atmosphere. Their sunlit undertone softens the geometry of large hardscape areas and reflects light in a way that feels calm and cohesive throughout the day. That warmth also allows the layout to feel comfortable, and connected, tying seamlessly into surrounding greenery and the glow of fire features. The result supports a broader design movement: a shift away from stark minimalism toward spaces that prioritize comfort, human scale and visual warmth, proving that neutral doesn't have to mean cold.

WELLNESS RETREAT

BALANCE BETWEEN BODY, MIND, AND SPACE

Backyards are evolving into personal sanctuaries. A place designed to restore both movement and mindfulness. This trend celebrates the balance between energy and recovery, where architecture supports a lifestyle of wellbeing. Outdoor gyms, saunas, hot tubs, cold plunges, and meditation zones come together to create spaces that nurture both the body and the mind.

Soft, calming tones bring a sense of serenity, while large-format slabs provide smooth, seamless foundations. Heated patios extend the season, offering easier access to wellness amenities even in cooler weather and provide non-slip surfaces that ensure comfort and safety year-round. The result is a refined yet restorative environment: a modern outdoor retreat built for renewal.

THE DECO ESCAPE

Travertina Raw slab and cap in Ivory

EVOKING THE GLAMOUR OF EUROPE'S SEASIDE RETREATS

Art Deco influence meets the quiet luxury of natural stone. Timeless, softly toned palettes inspired by travertine and real stone bring a refined, resort-style elegance to the modern poolside. Their warm, organic finishes ground the entire setting with an authenticity reminiscent of Europe's coastal hideaways: beautiful, enduring, and undeniably high-end.

Layered over this serene foundation, color comes to life. Inside the pool, artistic tilework replaces traditional liners, turning the water's surface into a living artwork of summer hues. Around it, checkerboard layouts and sorbet-striped fabrics introduce refreshing pops of seaside vibrancy. Together, these playful accents strike the perfect balance bringing a breezy European coastal attitude right to your backyard.

HOW TO VISUALIZE YOUR SPACE

1. Scan the QR code next to the product.
2. Point your phone at your yard or outdoor area.
3. Watch the product appear in real size.
4. Snap a photo to save or share!

FINISHES THAT FIT YOUR LIFESTYLE

THREE WAYS TO ELEVATE YOUR OUTDOOR SPACE.

Each surface offers a different experience. Whichever you choose, you’re investing in beauty, design, and long-lasting performance.

**KLEAN-BLOC**

ULTIMATE STAIN RESISTANCE

Developed to seal in the beauty of wet cast products, Klean-Bloc technology provides an advanced protective barrier against everyday spills. Enjoy the beauty and character of natural materials like travertine and wood grain, without the worry of maintenance.

**HD²**

VIBRANT COLOR & LESS PORES

Boasting higher particles per square inch, this dry cast technology leads to a tighter surface with less pores for the most flawless of finishes. From the smoothest smooth to the most intricate textures, HD² products are always ready for a close-up.

ESSENTIAL COLLECTION

QUALITY AND DURABILITY YOU CAN TRUST

With 35+ international patents, we aim to strike the perfect balance between beauty and durability. All Techo-Bloc stones are engineered to handle freeze-thaw climates, and are the ideal building blocks for any style of landscape design.

DE-ICING SALT
RESISTANT

Dimensions

Depth: 14 in 356 mm
2 3/8 x 32 in
60 x 813 mm

*The Terrazzo Collection comes with a factory-applied, water-based "natural look" protectant that enhances the surface and aids in maintenance. However, to maintain its de-icing salt resistant properties, it is essential to re-apply a concrete or natural stone water-based protectant or sealer periodically.

We recommend applying the protectant as soon as you observe water absorption. If water is still repelled, re-application is not yet necessary. Always test the protectant or sealer on a small, hidden area before full application.

WARRANTY

**GET OUR CARE AND
MAINTENANCE GUIDE**

A STANDARD OF CARE

The care of high quality concrete products is similar to the care of any product left in the environment 365 days and nights per year. Very mild cleaning using detergents, water and product specific chemicals is necessary and similar to cleaning patio furniture, a vehicle's chrome, plastic, or paint, etc. in order to enhance their presence and charm. Protectant of all types (high, middle, and low sheen, pigmented/tinted, penetrating or film forming) are available for additional protection from acid rain, stains and nature's worst. To get the most from your investments take care of them and they'll take care of you.

For any questions on industry-specific cleaners and protectant, see your local hardscape dealer/distributor, contact your contractor, contact us or search online.

It is contrary to Techo-Bloc's SOP (Standard Operating Procedures) to be involved in the care of a mature pavement or retaining structure. Care as mentioned above is the responsibility of the owner for any and all outdoor products.

CMHA disclaimer: "In areas where segmental retaining walls will be repeatedly exposed to snow (such as from snow plowing operations) consider periodically applying sealants or water repelling chemicals (silane or siloxane compounds) to the wall surface."

COLOR

Due to the inherent nature of printed literature and current digital media, Techo-Bloc cannot guarantee specific color matching to printed representations of its color swatches.

Each color option is composed of a variety of darker and lighter tones. Natural ingredients such as granite are present within the recipe to allow for a range in tones, veining and textures from one stone to another. Therefore, colors samples shown are approximate representations of our standard colors and actual product colors may vary.

Final color selection should be made at your local dealer from stocked product. Techo-Bloc always recommends immediately verifying the product and color upon reception. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes your acceptance of the product as is.

EFFLORESCENCE

This warranty does not apply to efflorescence. Efflorescence is a natural occurring process in all concrete products which sometimes appears in the form of a white powdery film on the pavement surface. Efflorescence is more perceivable in darker colors such as Onyx Black and Chocolate Brown as there is a higher level of contrast than with other blended colors. It does not, in any way, compromise the functionality or the structural integrity of the product. Although efflorescence cannot be prevented, it will wash off over time or can be cleaned with efflorescence cleaner. Techo-Bloc accepts no responsibility or liability for this condition.

POLYMERIC HAZE

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not, in any way, affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for instructions and recommendations. Techo-Bloc accepts no responsibility or liability for this occurrence.

CONSTRUCTION RESIDUE

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. Techo-Bloc accepts no responsibility or liability for these occurrences.

PROPER COLOR DISTRIBUTION AND LAYING TECHNIQUES

Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates an attractive and subtle blending of color.

COMPACTOR AND SNOW REMOVAL EQUIPMENT

Pavers with an embossed surface (high and low points) are more susceptible to scuff marks from vibratory plate compactors used in most concrete paver installations. Techo-Bloc recommends the use of a urethane mat between the plate and the paver surface during compacting. Contact your equipment supplier for more information about accessories for this purpose. Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. Techo-Bloc is not responsible for damage caused by the misuse of compaction or snow removal equipment, which may leave scuff marks, or burns on pavers.

NOTE:

For industry information about efflorescence, polymeric haze or information pertaining to installation specifications, please visit www.icpi.org or www.ncma.org.

LIMITED WARRANTY

The warranty applies to concrete landscaping and masonry products (herein referred to as “products”) intended for residential use and manufactured by the Techo-Bloc group.

All Techo-Bloc products comply with applicable standards established by the American Society for Testing and Materials (ASTM) and the Canadian Standards Association (CSA).

Techo-Bloc offers a transferable life-time warranty on its products, commencing on the date of delivery. The warranty covers the structural integrity of the products and any abnormal deterioration of its surfaces that may be caused by the use of rock salt (sodium chloride [NaCl]) for de-icing pavers, slabs or steps, with the exception of Wet Cast collection products, unless otherwise stated.

Techo-Bloc’s warranty excludes any third party products.

THE FOLLOWING CONDITIONS OR EVENTS ARE NOT COVERED BY THE WARRANTY:

1. Claims regarding the color, size, or texture of a product already installed. An installed product confirms the acceptance of the product received.
2. Use of rock salt and transferability of warranty on Wet Cast collection products unless otherwise stated.
3. Splitting, chipping or other breakage caused by impact, abrasion or overloading.
4. Damage or loss caused by the movement or settling of the underlying structure or base components upon which the products are set.
5. Damage or loss caused by design or installation not in compliance with local codes, industry standards or the guidelines provided by the Concrete Masonry and Hardscape Association (CMHA) or Techo-Bloc.
6. Damage or loss caused by natural disaster, including but not limited to, earthquakes, floods or other similar events.
7. Acts of negligence or misuse by the owner, installer or any third party.
8. Color matching to printed representations.
9. Efflorescence, polymeric haze or construction-born residue. (See the important information section for terminologies)
10. Damage or loss caused by the operation of compaction or snow removal equipment.
11. Normal wear and tear and normal behavior, such as variation in colors or shades.

In the event of product failure within the scope of this warranty, Techo-Bloc will replace the affected units only, following a site inspection and assessment of the products by Techo-Bloc or its representatives. Techo-Bloc’s responsibility is limited to the cost of the product only and not to the costs related to the installation or replacement of said products.

Note that replacement pieces may show noticeable differences in color, texture, or finish. These variations are a natural result of using materials from different manufacturing batches and are not considered defects and therefore are not covered under the Techo-Bloc warranty.

Techo-Bloc will honor this warranty only with a proof of purchase, such as an invoice or delivery slip.
